1. CREDITS and CONTACT INFORMATION:

1a. Credits:

Mikael Anteskog Adler has created the equipment. It is a strong, balanced and complete Efile that centers on the WW2 era. Legions of Il Duce version I-III was played by some people and notified me of several points that have now been improved! Drag Dasan made the beautiful Smacks for this campaign. Steve Brown/Dennis Felling let me use this readme template for my campaign as well. Thank you ALL!

1b. Contact information:

Any problems, suggestions, comments or abuse should be directed to me. Any feedback on this campaign, good or bad, will be greatly appreciated – Björn Neuhäuser.

3. INSTALLATION INSTRUCTIONS:

This readme assumes some basic knowledge of copying, moving and unzipping files in Windows and you should at least know which folder on your computer contains the program. User-made additions to Panzer General 2 are not as easy to install as the original software, but are not difficult if you read the installation instructions and use a certain amount of common sense - new maps, equipment files and other material ALL have installation instructions (some of which are included with the downloads and some of which are on the web sites). It is important to remember that

while I am very happy to help with any problems - all the information you need is available, you only need to take the time to find and read it. The [Upgrade Center](#) on Steve Brown's web site has the basics of upgrading.

3a. Download the campaign:

Download the campaign (yes, you most likely have done this already). This archive contains:

- CAMPAIGN.ZIP - The US/UK version of the campaign
- README.PDF - Campaign documentation
- EQUIPMENT.ZIP - Adlerkorps 4000 0.7

3b. Unzip:

Unzip files from CAMPAIGN.ZIP to your SCENARIO folder. Unzip files from EQUIPMENT.ZIP to your main program folder (usually PANZER2)

3c. Equipment file:

The, in this download included, Adlerkorps 4000 0.7 must be used. You need the equipment files, the 'SOUNDUP2005 for new sounds' (which you can download from Steve Brown's site or [Adlerkorps](#)), icons and other graphics upgrades from Steve Brown's site or Adlerkorps.com and the DATUP (for the graphics and icons) - if you have not installed equipment files or graphics updates before just download everything and follow the instructions, or contact me if you have questions. The [Upgrade Center](#) on Steve Brown's web site has the basics of upgrading.

3d. Maps download:

You need the maps JALO (361), EBRO (802), NICE (127), MATRUH (131), IMPHAL (230), KEREN (363), DALMATNN (321), PROKHORV (0), BARDIA (45), BIRHACH (216), DONB (238), ALAMEIN (46), KAZANSNW (34), SEDAN (22), GELA (69), MADRID (21), GALLABAT (365), ALEX (47), HABANIYA (368), SZOLNOK (499), BEIRUT (311), NOVOROSS (390), EURO (346)

Get the maps from the [Gilestiel MapFinder](#) or Steve Brown's [Clearinghouse](#).

3e. Maps install:

If you do not know how to install user maps, follow the instructions EXACTLY from 'How to use maps' at the Map Center and you should have no problems - most campaign crash problems are related to incorrect installation of the user maps;

3f. Video and Music:

This campaign uses the following smack/music files.

- introit.smk - Campaign Intro
- endit.smk - Campaign End
- bvit.smk - Italian Brilliant Victory
- lossit.smk - Italian Defeat
- italia1.mus - Background Sound

3g. Patches & running French or German versions of PG2:

You MUST first patch your program to v1.02 using the official SSI patch and you MUST also be using the 'unofficial' v2.20 or higher patch (the latest version at time of writing is 2.20). Look at the 'Versions & Patches' section of Builders Paradise for more information and the 'Clearinghouse' on Steve Brown's site for the unofficial patch. The unofficial patches will only work for US & UK versions of PG2; but will also work with German and French versions if you use the 'DEU/FRA to Text Converter' from the 'Downloads' section of Steve Brown's web site.

3h. List of playable campaigns in PG2

This campaign will be listed as "Legions of Il Duce". Once you have upgraded to the 'unofficial' version 2.02 patch, the up and down arrows of the scroll bar now work (but not the scroll bar itself), so scroll down until you see the campaign.

That's it ... start the campaign and enjoy!

4. REVISION HISTORY:

- Version 1.00 for Waffenkammer Efile released Mar 2000; 14 Scenarios
- Version 2.00 for Builders Paradise Efile released Jan 2002; 15 Scenarios

- Version 3.00 for Adlerkorps 2000 Efile released Mar 2002; 15 Scenarios

7. CAMPAIGN RULES:

This campaign uses no rules!

8. FINAL NOTE:

This campaign is the result of many months' work by Björn Neuhäuser and I consider it copyrighted. Please do not change anything on a version that you are making available to other players.
