**SALAT TIMES & QIBLAH GUIDE
FOR TOWNS AND CITIES
IN THE UNITED KINGDOM**

Part 2

By: Molvi Yaqub Ahmed Miftahi

Published by: **Hizbul Ulama U.K**

123

INTRODUCTION

These times have been kindly computed by Brother Khalid Shaukat, a well known Muslim scientist with a track record in the field of astronomical research. He is advisor to the Islamic Society of North America (ISNA). Dr Khalid Shaukat has ensured that observatory calculated times have been adapted for accuracy as observatory times do not take into account specific shariah requirements. This is explained below.

My sincere thanks to Brother Khalid Shaukat for supplying these times allowing ease for Muslims within the UK. If your town or city is not covered in this directory please either send an email to Yaqub Miftahi at the email address given above or to Brother Khalid Shaukat at shaukat@moonsighting.com and we will send Insha Allah the Salat times for your location.

The Fajar and Isha times shown are based on Mushahadah (naked eye observations) carried out by Ulama under the direction of Hizbul Ulama UK, in Blackburn during September 1987 - August 1988. Numerous Ulama from Jamiatul Ulama Bartaniya, Markazi Jamiatul Ulama and Hizbul Ulama UK agreed at a meeting held on 2 April 1988 (followed by another meeting on 2 January 1989) at Masjid Anisul Islam Troy Street, Blackburn, to adopt these times rather than use degree times that have been shown to be incorrect. The full background to determining Fajar and Isha times according to the Shariah is contained within the book "*Fajar and Isha*" by Y.A.Miftahi-English version available both electronically and as hard published version. An Urdu book, "*Bartaniya Me Isha Ka Sahih Waqt*" by Y.A.Miftahi is also available in hard published version only. For a copy of these books please send an email

request to: info@hizbululama.org.uk, telephone me on ++447866464040, or write at the address below.

Sunrise - The effects described for sunset above apply also to sunrise and will have the effect of an earlier sunrise than observatory calculated times. As the sunrise times given in the tables below are calculated sunrise times, it is advised that a minimum of three minutes is **taken away** from the sunrise time given within the timetables below. Alternatively, you may add a note of caution in your Masjid timetables advising worshippers to refrain from prayer during the last few minutes of sunrise.

Zuhr in most Prayer Schedules is shown at Noon (which is before Zawaal). Noon time, when the sun is at its highest point, is Mamnoo' (Prohibited) time for any Prayer. Theoretically, the sun does not go into Zawaal phase until its edges are out of the zenith line (line between the observer to the center of the sun when it is at Noon-phase). It takes about 1.5 minutes for the sun's disk come out of zenith. Additional 1 minutes must be added for a 30 miles radius consideration mentioned for Maghrib time. Thus, a minimum of 2.5 minutes must be considered as the minimum limit past Noon time for the beginning of Zuhr. Considering, that this precise theoretical definition is not given by any scholar, a little factor of safety (additional 2.5 minutes) is considered as a minimum for the beginning of Zuhr. Thus, 5 minutes should be added in Noon time for Zuhr.

Asr time calculations require different interpretations by different jurists such as Hanafi, Shafi'i, Maaliki, Hambali, or Ja'friyah (Shi'aa).

Maghrib should be calculated at least as 3 minutes after sunset for the following considerations:

1. The effects of actual humidity, temperature, and pressure in the atmosphere may cause a different refraction of sun light than assumed in calculations.
2. In some areas there could be a downward sloping ground towards western horizon that causes a delayed sunset for an observer compared to a perfectly level ground as assumed in calculations.
3. For major metropolitan cities, the sunset in a 30 mile radius from the point taken in calculation varies. Since the people using this schedule may live all around the city, this may delay sunset for some areas. These are the considerations for the 4 major Sunni school of thought.

Qiblah direction: Every day, there comes a time when any vertical object's shadow from the sun is in the Qiblah direction. If that does not happen then there is a time when facing the sun gives you Qiblah direction. Either of this time is provided for everyday in Qiblah column after Isha. This method for Qiblah is more accurate than the compass, which involves errors due to the presence of magnetic fields or metallic objects, and magnetic declination which causes compass needle to magnetic North which could be up to 100° off from True North; how many degrees off depends upon the location.

For requesting Prayer Schedule & Qiblah Direction, Send email with the following information:

1. City, and State/Country?

2. What school of thought (Shafi'i, or Hanafi, or both, or Maaliki, or Hanbali?). Do you need Qiblah Direction column?

British Summer Time Adjustment - The tables take into account changes due to daylight/summer time. It is therefore not necessary for you to adjust your timetable when the clocks change in March and October. However as this template is based on the 2007 calendar, it may be necessary that for future years you may need to adjust the times by one hour for a few days only depending on when the last Sunday of these months falls, i.e. the last Sunday in March 2007 is on 25th, but in 2008 the last Sunday falls on 30th March, so therefore the time will adjust to 1 hour backward from 25th to 29th of March 2008, the remaining dates of months have already decreased in time until October 2008.

Similarly the last Sunday of October 2007 is on the 28th, and the last Sunday in 2008 is on 26th, therefore the time will adjust to 1 hour forward from the 26th to 27th of October 2008, the remaining dates of months have already increased in time until March 2008. This is the process that one must apply to future years and months.

May Allah *subhanahawataalaa* accept this humble effort, and pardon our faults. Aameen.

Note: Fasting commences at Fajar beginning time.
