384 Byte Democompo Voting

Time to vote

The "[384 Byte Democompetition](#)" is over now. 10 entries have been submitted all over all, with several pretty innovative and impressing ones among them.

Now it is your task to vote. You can download an archive containing all exes here ([lha](#)) or ([lzx](#)). They were tested on an 68060 with cybergfx. So I guess they should run on all configurations. Some might need quite a lot of processing power. The sources can be downloaded here ([lha](#)) or ([lzx](#)). Please read "*readme.txt*".
