Dawn (4k intro) sourcecode

Here it is...

Wanting to release the source of Dawn, the TP5 4k-intro competition winner, for a longer time now, I finally decided to release it today. Use it to validate your disassemblies or do whatever you want to do with it. Of course I would appreciate to get credited whenever you use snippets of the code in your own productions.

Dont forget that the source is now about three years old. Its extremely messy - mostly because the biggest part of it was done in a single night. It doesnt represent any state-of-the-art technologies. In fact I and numerous other people would be able to make dawn smaller and faster now.

Try Asmone to assemble the source..

So - leech it [here](#).

Azure.
